Introduction to MATLAB

Noah Roberts

Agenda

- I. Introduction
- II. MATLAB Desktop and Scripts
- III. Data Visualization
- IV. Arrays and Matrices
- V. Logical Indexing
- VI. Resources

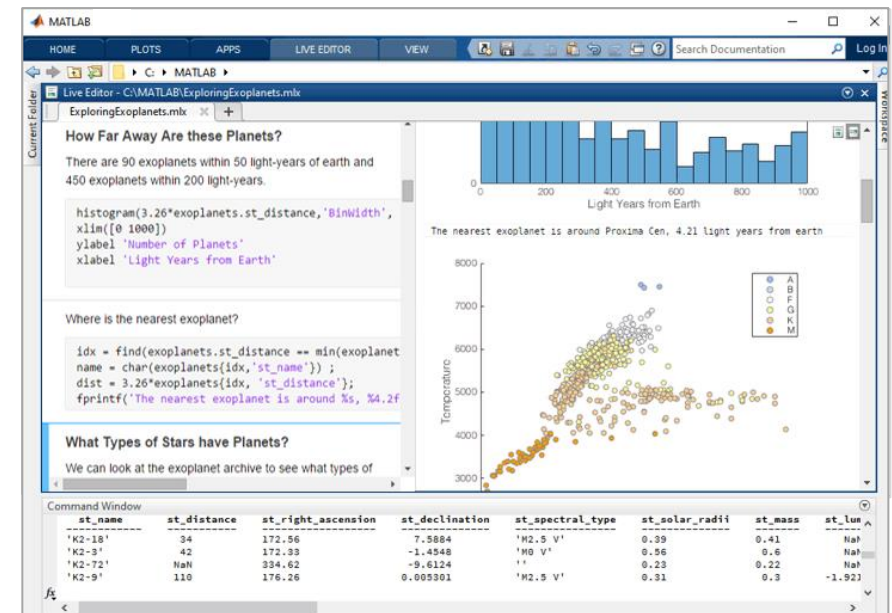

Our Products

MATLAB® & SIMULINK®

- **MATLAB** - Programming environment for algorithm development, data analysis, visualization, and numeric computation.
- **Simulink** - Block diagram environment for simulation and Model-Based Design of multidomain and embedded engineering systems.
- **130+ add-on products** for specialized tasks.

Computer-Aided Design Toolbox

Our software is used to design the products we rely on every day

Automobiles

Commercial Aircraft

Smartphones

Consumer Goods

And the breakthroughs transforming how we live, learn, and work

Our Customers / Key Industries

Aerospace and Defense

Automotive

Biological Sciences

Biotech and Pharmaceutical

Communications

Electronics

Energy Production

Financial Services

Industrial Machinery

Medical Devices

Process Industries

Neuroscience

Railway Systems

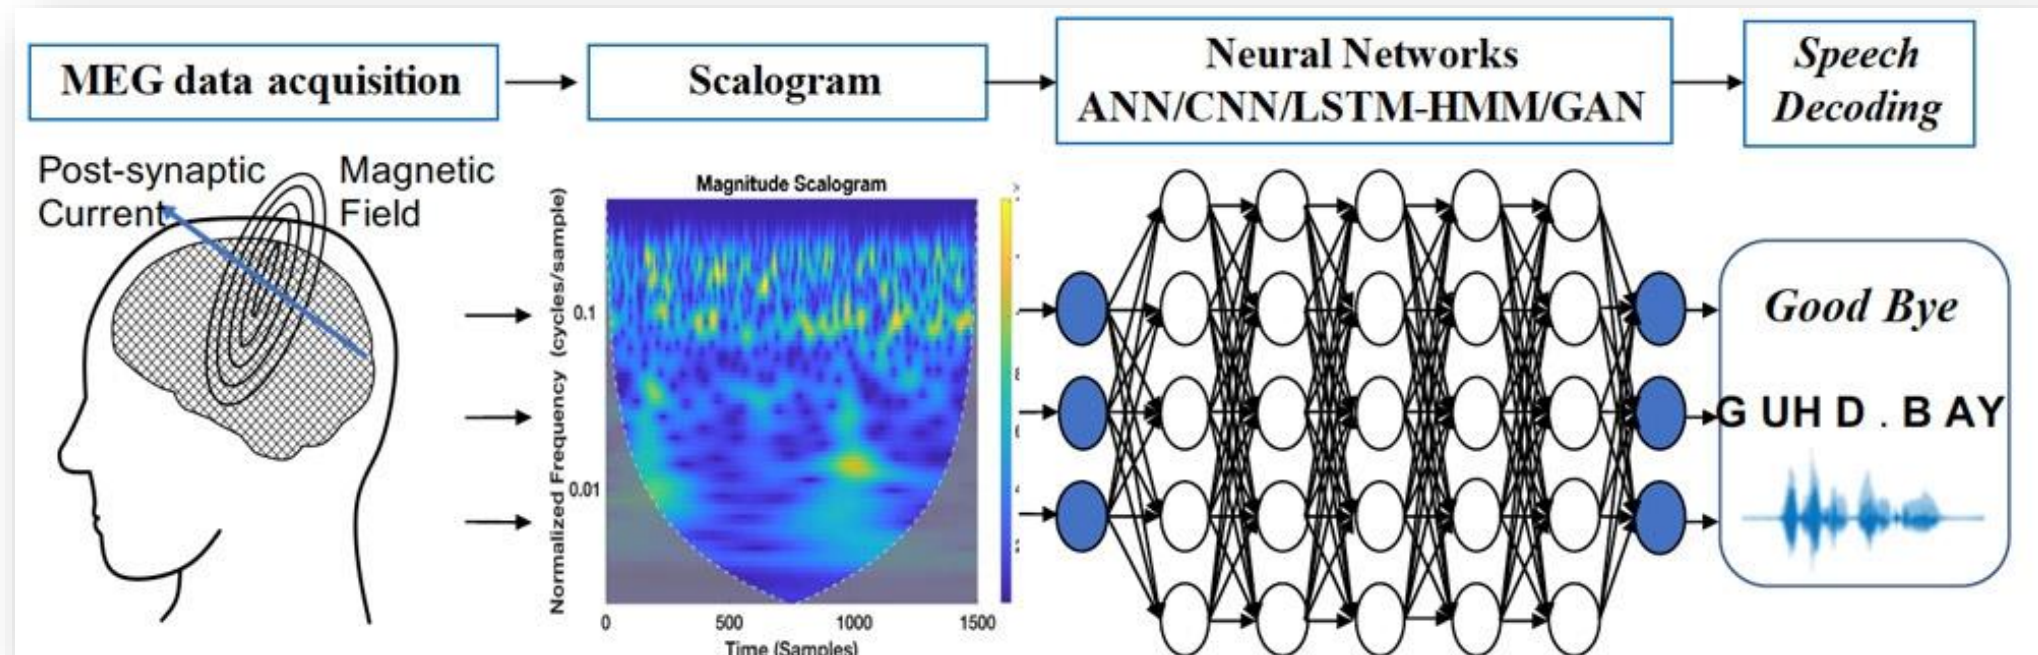

Semiconductors

Software and Internet

Neuroscience

[UT Austin Researchers Convert Brain Signals to Words and Phrases Using Wavelets and Deep Learning](#)

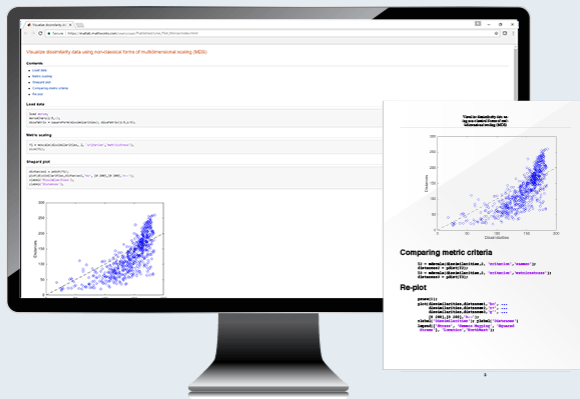

Why MATLAB?

- Extremely easy to code
 - Can be used for rapid prototyping and trying out ideas before production
- MATLAB speaks Math
 - Solve equations like you do on your book.
- Specially designed for scientists and engineers
 - Function names and signatures are familiar and memorable.
- Inbuilt apps
 - Filter designer, Signal analysis, Curve Fitting, Deep Network Designer, etc
- Interoperability with other programming languages
 - Python, C++ and many others

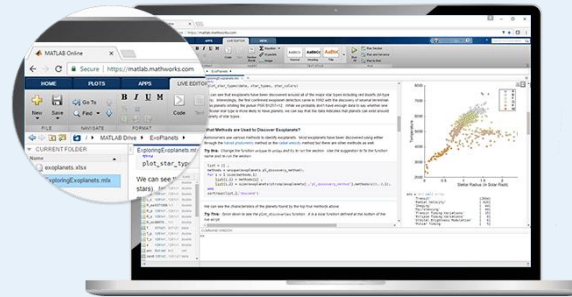

Campus Wide License

Anytime, Anywhere Access for Faculty, Staff, Students, and Visitors

MATLAB for Desktops

Access MATLAB on personal and university-owned machines

MATLAB Online

Access MATLAB with a web browser

MATLAB Mobile

Access MATLAB on iOS/Android devices

Visit your university MATLAB portal

Visit matlab.mathworks.com

Duke University

MATLAB and Simulink Access for Duke University

Both are available through your school's license.

100,000+

companies, from market leaders to startups, use MATLAB and Simulink

4 million+

MATLAB and Simulink references in research citations

82%

of Fortune 500 companies use MATLAB and Simulink

5 million+

MATLAB and Simulink users worldwide

MATLAB Environment Introduction

Build MATLAB Proficiency

LEARNING PATH

Develop a broad set of MATLAB skills, enabling you to tackle more complex problems.

Topics covered:

- Creating informative scripts
- Analysis of data in vectors, matrices, and tables
- Techniques for extracting subsets of data
- Programming constructs and functions

Recommended prerequisite:

MATLAB Onramp
2 hours

MATLAB Desktop Tools and Troubleshooting Scripts
1 hour

Explore Data with MATLAB Plots
2 hours

Make and Manipulate Matrices
1 hour

Calculations with Vectors and Matrices
1.5 hours

Tables
2 hours

Find and Extract Subsets of Data
1.5 hours

Programming Constructs
2 hours

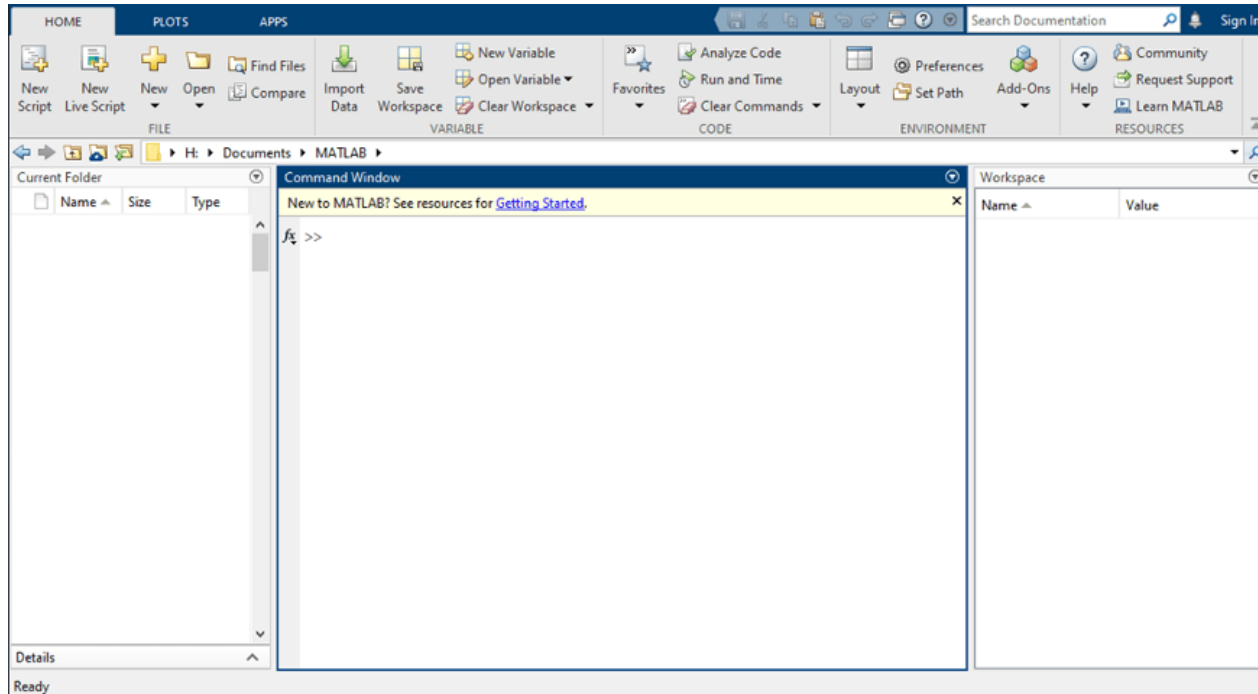

The How and Why of Writing Functions
1 hour

Exercise 1: Using the MATLAB Desktop

MATLAB Desktop Tools and Troubleshooting Scripts
1 hour

- MATLAB Desktop Editor
- Storytelling with Scripts
- Debugging MATLAB Code

Distribution of Fatalities

We can use a bar chart to see the distribution of fatality rates among the states. There are 11 states that have a fatality rate greater than 0.02 per million vehicle miles.

```

histogram(rate,10)
xlabel('Fatalities per Million Vehicle Miles')
ylabel('Number of States')
  
```

Find Correlations in the Data

We can experiment with the data to see if any of the variables in the table are correlated with highway fatalities. It appears that highway fatality rates are lower in states with a higher percentage urban population.

```

varName = 'urbanPopulation';
scatter(fatalities.(varName),rate)
xlabel(varName)
ylabel('Percent Fatalities per Million Vehicle Miles')

hold on
xmin = min(fatalities.(varName));
xmax = max(fatalities.(varName));
p = polyfit(fatalities.(varName),rate,1);
plot([xmin xmax], polyval(p,[xmin xmax]))
  
```

Exercise 2: Visualizing your Data

Explore Data with MATLAB Plots
2 hours

- Visualize Vectors
- Plot Data for Comparison

3-D Contour Plot of the function $z = \sin(x) + \cos(y)$

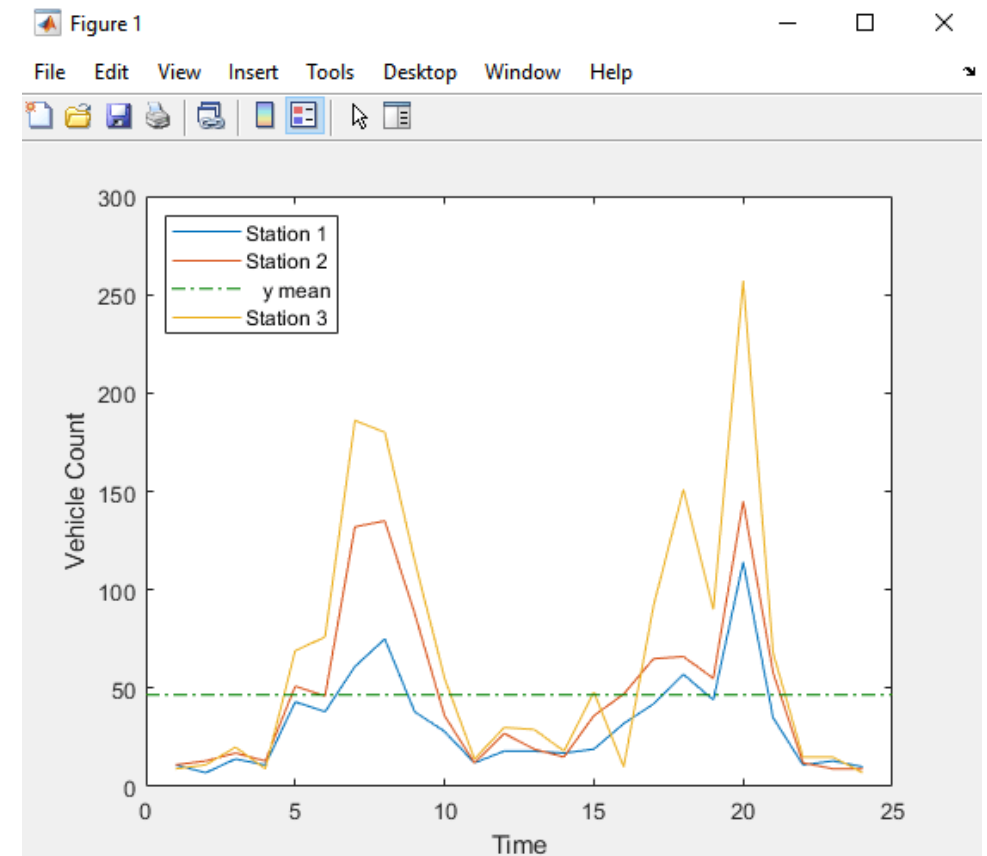

Line Plots	Scatter and Bubble Charts	Data Distribution Plots	Discrete Data Plots	Geographic Plots	Polar Plots	Contour Plots	Vector Fields	Surface and Mesh Plots	Volume Visualization	Animation	Images

Exercise 3: Statistical Operations

Calculations with Vectors and Matrices
1.5 hours

- Operations on Arrays
- Statistical Operations on Matrices

Logical Indexing

Exercise 4: Logical Indexing

Find and Extract Subsets of Data
1.5 hours

- Logical Operations
- Logical Vectors
- Conditional Data Selection

Logical Indexing

Team	Wins	Losses	
Montevideo Matrices	20	7	✓
Fresno Fireants	3	27	✗
Imaginario Madrid	19	10	✓
Manchester Divided	19	10	✓
Pittsburgh Penguins	9	19	✗
Natick Narwhals	9	22	✗

Accessing Data from MATLAB

Access

Explore & Discover

Share

- Files
 - Excel, text, or binary
 - Audio and video, image
 - Scientific formats and XML
- Web Services
 - JSON, CSV, and image data
- Applications and languages
 - C/C++, Java, FORTRAN, Python
 - COM, .NET, shared libraries
 - Databases (*Database Toolbox*)
- Measurement hardware
 - Data acquisition hardware (*Data Acquisition Toolbox*)
 - Stand-alone instruments and devices (*Instrument Control Toolbox*)

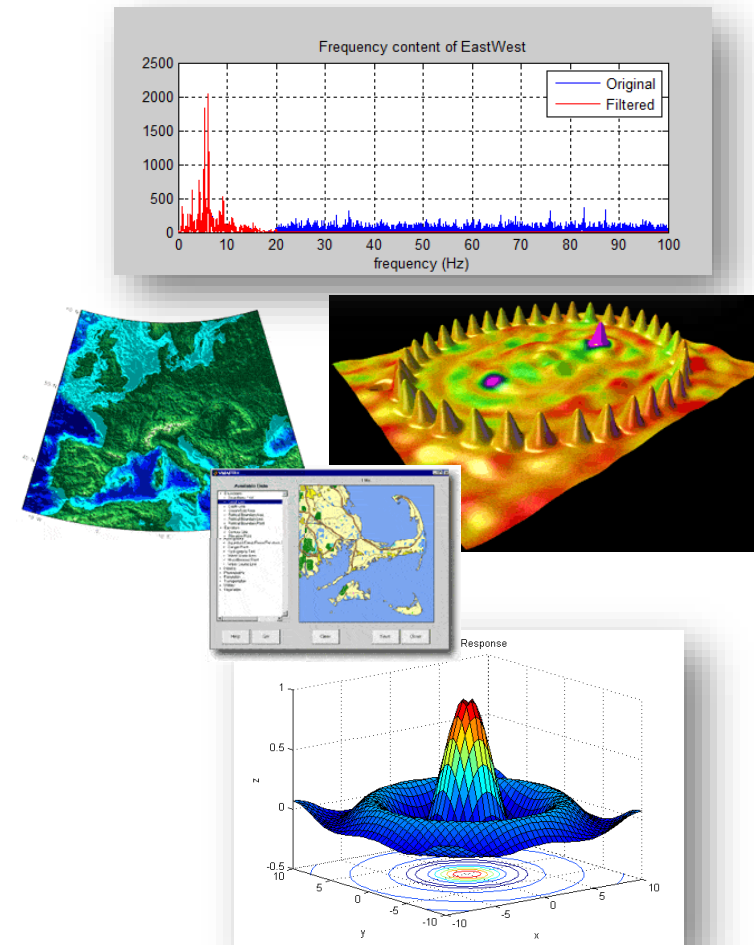

Data Analysis and Visualization in MATLAB

Access

Explore & Discover

Share

- Data analysis
 - Manipulate, preprocess, and manage data
 - Fast, accurate analysis with pre-built math and engineering functions
- Visualization
 - Built in graphics functions for engineering and science (2D, 3D, volume visualization)
 - Interactive tools to annotate and customize graphics

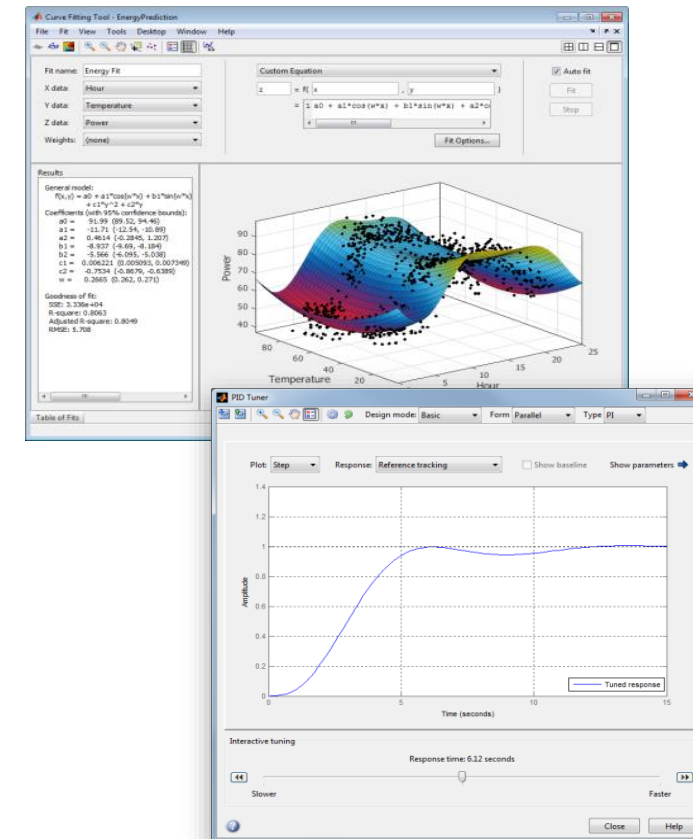

Expanding the Capabilities of MATLAB

Access

Explore & Discover

Share

- MathWorks add-on tools for:
 - Math, statistics, and optimization
 - Control system design and analysis
 - Signal processing and communications
 - Image processing and computer vision
 - Parallel computing and more...
- Partner products provide:
 - Additional interfaces
 - Domain-specific analysis
 - Support for niche applications

Sharing Results from MATLAB

Access

Explore & Discover

Share

- Automatically generate reports
 - Publish MATLAB files
 - Customize reports using MATLAB Report Generator
- Package as an app
- Deploy applications to other environments

Plot Data and Model

The result from the Curve Fitting Toolbox has a `plot` method for displaying the result graphically. We can choose to display the prediction bounds for the fit.

```
figure;  
hh = plot(cf, 'r', carDataDS.RatedHP, carDataDS.MPG, 'predfunc', 0.95);  
set(hh(2), 'LineWidth', 2);  
set(hh(3:4), 'LineStyle', '-', 'Color', [0 .5 0]);
```

Packaging and Sharing MATLAB Apps

- MATLAB apps
 - Interactive applications to perform technical computing tasks
 - Displayed in apps gallery
- Included in many MATLAB products
- Package your own app
 - Create single file for distribution and installation into gallery
 - Packaging tool:
 - Automatically includes all necessary files
 - Documents required products
